

Daihatsu Exhibits VIZION-F Compact Commercial Van BEV Concept Model and Other Vehicles at Gaikindo Indonesia International Auto Show 2023
~ Contributing to the realization of carbon neutrality with diverse options such as LCGC*1 and electrified vehicles ~

VIZION-F

Daihatsu Motor Co., Ltd. (hereinafter “Daihatsu”) announced today that P.T. Astra Daihatsu Motor (hereinafter “ADM”), its Indonesian subsidiary, will exhibit 13 vehicles at the Gaikindo Indonesia International Auto Show 2023 held in Jakarta from Thursday August 10 to Sunday 20, 2023. Among the vehicles on display will be the All New AYL A that was completely redesigned in March 2023 and the VIZION-F compact commercial van electric vehicle (BEV) concept model.

Daihatsu seeks to contribute to the realization of carbon neutrality in Indonesia by adopting a multi-pathway approach. To allow customers in Indonesia to choose the most appropriate car from diverse options, Daihatsu is undertaking a variety of research and development—such as high-quality and affordable LCGC-compliant eco-cars that are fuel efficient, conserve natural resources, and friendly to the environment from the LCA*2 perspective as well as HEVs, BEVs, and other electrified vehicles—while staying thoroughly committed to localization.

Daihatsu will exhibit a show model of the All New AYL A, a five-seater, LCGC-compliant compact car that was launched in March 2023. In addition, Daihatsu will also exhibit the VIZION-F, a concept model designed and produced by ADM’s R&D based on the GRAN MAX VAN compact commercial vehicle. Through this, Daihatsu shows new possibilities toward electrification of commercial vehicles in the most appropriate form for Indonesia, with a view of higher transportation volume and response to the demand for efficient last-mile logistics in line with Indonesia’s further economic growth as well as growing needs in the future for carbon neutrality of the transportation industry and companies.

Furthermore, Daihatsu will also exhibit the Atrai Japan Kei-car that can be used for a wide range of purposes—such as leisure—besides commercial use, conveying the company’s desire to contribute toward the realization of carbon neutrality and invigoration of mobility in Indonesia through its diverse lineup.

Going forward, under the group slogan “Light you up,” Daihatsu will continue to manufacture high-quality, affordable vehicles that closely match the needs of its customers, while aiming to be a company that contributes to the popularization of automobiles, industrial development, and human resource development in Indonesia and other regions with a focus on ASEAN.

*1: Low Cost Green Car, Indonesia’s eco-car standard

*2: Life Cycle Assessment
