Wake X Nami-Densetsu Version SA

Daihatsu Motor Co. Ltd. (hereafter Daihatsu) will launch special specification models of its mini passenger car Wake nationwide from Tuesday, June 30.

The Wake launched in November 2014. In addition to packaging that achieved great visibility and best-in-class interior space^{*1}, the Wake is characterized by its high level of convenience when used for leisure activities thanks to the participation of “leisure professionals” in fields such as camping and surfing during its planning stages. As a result, the Wake has continued to generate healthy sales.

The latest special specification models

- 1) Daihatsu has configured two models, the camping and mounting climbing-focused X MontBell Version SA and the Surfing-focused X Nami-Densetsu Version SA, jointly developed by comprehensive outdoor brand MontBell and surfer wave information site Nami-Densetsu. The cars will be available in limited numbers^{*2} as special specification models, and feature equipment to further enhance convenience during leisure activities and employ dedicated decals.
- 2) Two “Fine selection SA” types with more appealing exteriors and equipment for greater comfort have been configured. “Fine selection” equips models with features such as popular Hood Garnish using genuine parts (plated or plain type), special 14-inch aluminum wheels^{*3}, a Style Pack^{*4}, Comfortable Pack and more, all at a more affordable price.

Details of the above features are described on the following page

*1: Based on Daihatsu research, as of June 2015

*2: X MontBell version SA / X Nami-Densetsu version SA total limited production run of 1,500 vehicles

*3: Specially equipped in X Fine Selection SA

*4: Specially equipped in L Fine selection SA

- ◆ Daihatsu Motor Co., Ltd. and mont-bell Co., Ltd. are special supporters of the SEA TO SUMMIT 2015 environmental sports event, which offers experience with the cycle of nature through outdoor sports.
- ◆ Daihatsu Motor Co., Ltd. provides Nami-Densetsu website operator SURFLEGEND INC. with Wake cars as wave measurement vehicles.
