## Daihatsu Partially Upgrades its Hijet Truck Mini Commercial Vehicle Smart Assist grades now come with LED headlights as standard

Hijet Truck Extra “SAIII”

Daihatsu Motor Co., Ltd. (hereinafter “Daihatsu”) has partially updated its Hijet Truck mini commercial vehicle. The vehicle will go on sale nationwide on October 10.

The Hijet mini commercial vehicle was launched in 1960. Since then, it has been cherished by customers in a wide variety of industries, including the farming, construction, transportation, and service industries. The Hijet is a popular model, and total production volumes have now exceeded seven million units.

The Hijet Truck was fully redesigned in September 2014. Basic performance—including loadability, durability, and rust resistance—was improved, and the new generation was made available in eight different color variations with a diverse range of amenities. The Hijet Truck was partially redesigned in May 2018, when it became the first mini truck to be equipped with the Smart Assist III crash avoidance system.

As part of the partial redesign announced today, all Smart Assist III grades now come with LED headlights as standard; this will improve nighttime visibility and contribute to greater levels of safety. Daihatsu’s lineup of refrigerator and freezer vehicles has also been expanded with the addition of the Color Aluminum Low-temperature Freezer Vehicle\*<sup>1</sup>.

Based on its “Light you up” approach, going forward Daihatsu will continue to provide optimal mobility to every one of its customers, and cater to their needs via its extended range of mini vehicles and compact cars.

\*<sup>1</sup>Production scheduled to commence in November 2019

### Details of the partial upgrade to the Hijet Truck

- Smart Assist III grades are now equipped with LED headlights as standard (the Jumbo grade was already equipped with LED headlights as standard)
- The “Stylish Pack”—which includes LED fog lights and a plated front grille—is newly available
- The Color Aluminum Low-temperature Freezer Vehicle has been added to the special purpose vehicle lineup (this grade is produced in-line by Daihatsu Motor Kyushu Co., Ltd.)
