

Daihatsu Partially Upgrades the Boon compact passenger car
~ To strengthen safety features on all grades; new body colors available~

Boon X “L Package SA III”

Daihatsu Motor Co., Ltd. (hereinafter “Daihatsu”) has partially upgraded the Boon compact passenger car, and will launch the new model nationwide on Thursday, April 1.

With the Boon, Daihatsu incorporated the technologies and expertise it had cultivated through its development of mini vehicles into a compact car; this resulted in a passenger car that, thanks to its smart and high-quality design, has become popular among a wide range of customers. The current, third-generation Boon was released in April 2016. In addition to the Boon and the Boon CILQ, in 2018 Daihatsu added a third model to its line-up—the Boon STYLE—and the availability of three distinctive models has contributed to customer’s favorite design.

For this partial upgrade, Daihatsu has simplified the grade system, and also equipped all grades with Smart Assist and Auto Light as standard. In addition to strengthen safety features, updates have also been made in other areas—the Boon X “L Package SA III,” for example, comes with LED headlights as standard. Nevertheless, the models retain the same affordable pricing as before.

Body colors have also been partially changed, and a new Turquoise Blue Mica Metallic color has been added.

Based on its “Light you up” approach, going forwards Daihatsu will continue to provide optimal mobility to every one of its customers, and cater to their needs via its extended range of mini and compact vehicles.

Overview of partial upgrade
