**Daihatsu Partially Improves the Move Canbus and Move,
and Introduces a Special Edition Model for the Move Canbus that
Expands Its Unique Worldview**

Stripes G “Interior Selection”

Theory G “Interior Selection”

Move RS

Daihatsu Motor Co., Ltd. (hereinafter “Daihatsu”) announced partial improvements to its mini passenger vehicles, the Move Canbus and Move, and will introduce a new special edition Move Canbus model, to be launched nationwide on Wednesday, July 29.

The Move Canbus is offered in two distinct styles: Stripes, which carries forward the charm of the original model while giving it a clean, refined look, and Theory, which expresses a high-quality, calm worldview. Daihatsu has now introduced the new special edition Interior Selection model. By adopting the interior worldview of the counterpart model for both Stripes and Theory, the new model blends the appeal of both. In addition, Daihatsu has introduced two new styles, Urban Grace Style and Retro Pop Style, which combine dedicated accessories and extend the worldview fusion realized in the special edition model beyond the interior and into the exterior.

As part of the partial improvements, new body colors have been added to the Move Canbus to further expand its distinctive worldview. In addition, both the Move Canbus and Move now feature enhanced Smart Assist*1 preventive safety functions, including cyclist detection, detection of oncoming vehicles when turning right at intersections, and detection of crossing pedestrians approaching from the opposite direction when turning left or right. These enhancements improve safety, while the adoption of an Active Multi-Information Meter (7-inch TFT + digital speedometer) also improves convenience.

Daihatsu will continue to provide affordable, high-quality products that stay close to customers’ daily lives.

*1: Smart Assist is designed to support the driver’s safe driving. The functions have limitations and may not operate depending on road, weather, and other conditions. Do not over-rely on the functions; always drive safely. For details, please contact a sales company or visit the official website.

[Overview of Special Edition Models] [Move Canbus]

< Stripes G “Interior Selection” / Stripes G Turbo “Interior Selection” >

A special edition model that combines the charming two-tone colors of Stripes with the stylish interior of Theory. The charming character of Stripes is complemented by a calm and refined interior space.

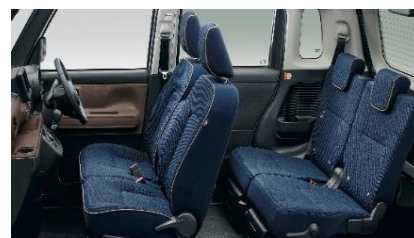

Base Grade	Stripes G Stripes G Turbo
Special Equipment	• Instrument panel / door trim (Brown) • Full-fabric seats (Navy) with seat piping • Leather-wrapped steering wheel (with chrome ornament and Premium Shine Black accents) • Leather-wrapped instrument-panel center shift (with chrome button / chrome accents)

[Overview of Partial Improvements]

< Body color > [Move Canbus]

- Smooth Gray × Grace Brown added to Stripes
- Ceramic Green added to Theory

< Enhanced Safety > [Move Canbus] [Move]

- Additions and changes to the Smart Assist preventive safety functions
 - Cyclist detection
 - Detection of oncoming vehicles when turning right at intersections, and detection of crossing pedestrians approaching from the opposite direction when turning left or right
 - Maximum speed condition for pedestrian detection changed from 60 km/h to 80 km/h
- Improved ACC(Adaptive Cruise Control)/LKC(Lane Keep Control) performance
 - ACC(Adaptive Cruise Control) realizes smoother behavior than before through improvements to preceding-vehicle detection distance and accuracy
 - Reduced wavering during LKC(Lane Keep Control) operation to improve reassurance

< Improved Convenience > [Move Canbus] [Move]

- Adoption of an Active Multi-Information Meter (7-inch TFT + digital speedometer), featuring simple, refined graphics with high visibility
